# **Veracyte Analyst Day Observations**

## CONCLUSION

Veracyte detailed upcoming pulmonology pipeline products, including their Lung Cancer Diagnostic (formally BronchoGen from the Allegro acquisition) and Interstitial Lung Disease test, on-track to launch 2H15 and 2016, respectively. The pulmonary tests target a \$1.2B combined market opportunity. On Afirma, management announced contracts with Cigna and UnitedHealthcare. As a reminder, Cigna and UNH had positive medical policy decisions in place, but in-network status should lead to improved cash flow and incremental physician adoption, in our opinion. All in, we view the inaugural analyst day as positive for Afirma and the pipeline.

- Afirma Update: Management announced Cigna and UnitedHealthcare as the first innetwork payers, effective end of 2014. While both payers previously considered Afirma medically necessary, the contract should increase cash flow timing. Additionally, given some physicians are reluctant to use out-of-network tests, the contracts should incrementally accelerate doctor adoption, in our opinion.
- Next Stop, Pulmonology: Veracyte spent a majority of the analyst day detailing the upcoming pulmonology tests. On the Lung Cancer Diagnostic, Dr. Vachani described difficulties classifying the 20%-50% of indeterminate bronchoscopy results in patients with lung nodules. Like thyroid procedures, a high percentage of these patients undergoing additional screening and procedures are found to be negative by pathology. Initial results from the AEGIS I trial (n: 298) are encouraging as a low risk rule out with a high NPV of 0.93 and an AUC of .78. In terms of next steps, we believe Veracyte's product launch and reimbursement strategy will benefit from outcomes and economics studies. The Interstitial Lung Disease (ILD) test is the second foray into the pulmonology market, utilizing gene expression to detect Idiopathic Pulmonary Fibrosis (IPF). Currently, a majority of ILD patients are incorrectly diagnosed with IPF. Recognizing the preliminary nature of the data presented at the American Thoracic Society earlier this year, Veracyte's assay nevertheless appears like a valuable tool to diagnose IPF. Without good therapy, diagnostics lose considerable value and encouragingly, there are multiple therapies moving through FDA (pirfenidone and nintedanib) that specifically address this patient population. The assay remains on track for a 2016 launch.

#### RISKS TO ACHIEVEMENT OF PRICE TARGET

Veracyte risks include GEC adoption, private payer coverage and competition.

## **COMPANY DESCRIPTION**

Veracyte develops molecular cytology tests; initially focusing on the thyroid FNA market.

Note: Distribution of Ratings/IB Services shows the number of companies currently in each rating category from which Piper Jaffray and its affiliates received compensation for investment banking services within the past 12 months. FINRA rules require disclosure of which ratings most closely correspond with "buy," "hold," and "sell" recommendations. Piper Jaffray ratings are not the equivalent of buy, hold or sell, but instead represent recommended relative weightings. Nevertheless, Overweight corresponds most closely with buy, Neutral with hold and Underweight with sell. See Stock Rating definitions below.

# Research Disclosures

Piper Jaffray usually provides bids and offers for the securities of Veracyte, Inc. and will, from time to time, buy and sell Veracyte, Inc. securities on a principal basis.

Piper Jaffray research analysts receive compensation that is based, in part, on overall firm revenues, which include investment banking revenues.

# **Rating Definitions**

Stock Ratings: Piper Jaffray ratings are indicators of expected total return (price appreciation plus dividend) within the next 12 months. At times analysts may specify a different investment horizon or may include additional investment time horizons for specific stocks. Stock performance is measured relative to the group of stocks covered by each analyst. Lists of the stocks covered by each are available at www.piperjaffray.com/ researchdisclosures. Stock ratings and/or stock coverage may be suspended from time to time in the event that there is no active analyst opinion or analyst coverage, but the opinion or coverage is expected to resume. Research reports and ratings should not be relied upon as individual investment advice. As always, an investor's decision to buy or sell a security must depend on individual circumstances, including existing holdings, time horizons and risk tolerance. Piper Jaffray sales and trading personnel may provide written or oral commentary, trade ideas, or other information about a particular stock to clients or internal trading desks reflecting different opinions than those expressed by the research analyst. In addition, Piper Jaffray technical research products are based on different methodologies and may contradict the opinions contained in fundamental research reports.

- Overweight (OW): Anticipated to outperform relative to the median of the group of stocks covered by the analyst.
- Neutral (N): Anticipated to perform in line relative to the median of the group of stocks covered by the analyst.
- Underweight (UW): Anticipated to underperform relative to the median of the group of stocks covered by the analyst.
