OPHTHOTECH CORPORATION

Increasing Our PT on Encouraging Survey Feedback, Favorable NVS Deal

- Bottom Line: We are increasing our OPHT Price Target to \$61 from \$45 after encouraging feedback from 43 surveyed MEDACorp ophthalmologists (LINK) and the recent NVS (OP) partnership which provided OPHT with \$200MM in cash upfront. Physicians project a robust market opportunity OPHT's Fovista in both treatment naive and notwell-controlled anti-VEGF-treated patients, the former of which presents upside to our \$747MM peak Fovista US risk-adjusted sales estimate in 2026. As the Fovista Phase III enrolls, OPHT stands to earn an additional \$130MM from NVS in enrollment-based milestones. Reiterate OP on OPHT, raising our PT to \$61 from \$45/share.
- Physicians state that 53%, 33% and 15% of their anti-VEGF treated patients currently have better, the same, or worse visual acuity after receiving anti-VEGF therapy, which implies a robust market opportunity for Fovista, in our view. Most surveyed physicians believe that the majority of their anti-VEGF-treated patients first improve but with prolonged follow-up will almost always decline. Our survey data is corroborated by various clinical studies, including previously published SEVEN-UP data that showed a long-term regression to baseline in anti-VEGF treated individuals and a recent study of >11K Lucentis treated patients published in *Ophthalmology* demonstrated that patients reverted to pre-treatment visual acuity levels by year 3 then declined further.
- ~91% of physicians believe the Fovista Phase II data is highly or modestly clinically significant, and at peak, respondents project that 27%, 13% and 47% of their treatment naïve, well-controlled and not-well controlled wet AMD patients will be on Fovista therapy. Such estimates imply significant upside to our OPHT model we project ~33% peak Fovista penetration in 2027 in patients not-well-controlled by an anti-VEGF. While these projections ignore potential competition from REGN's (OP) co-formulation anti-VEGF/-PDGF product, REGN's program is currently well behind Fovista, given that the former is currently enrolled in a 24-patient, open-label Phase I and the latter is enrolled in a ~1000 patient Phase III.
- Survey respondents are split ~60%/~40% regarding whether or not two injections for OPHT's Fovista/anti-VEGF are inconsequential or will represent a significant impediment to uptake. Physicians highlighted the pros and cons of two anti-VEGF injections which provide insight into the bull/bear theses on OPHT. Many physicians believe that two injections are a non-issue, while others wonder if two injections will either be unattractive to patients or difficult to implement in the office. While a co-formulation product from REGN (or NVS/OPHT's preclinical co-formulation) could be more attractive than two separate injections to most physicians, we believe the flexibility to use Fovista with Avastin in the clinic could potentially provide a attractive combination product which cost less than Lucentis or Eylea monotherapy.

INVESTMENT THESIS

We rate OPHT shares Outperform. Ophthotech is a late stage biopharmaceutical company that is primarily focused on the development of Fovista, an anti-Platelet Derived Growth Factor (PDGF) agent that has shown a statistically significant capacity to augment vision in wet Age-Related Macular Degeneration (AMD) patients. In Phase IIb, a combination of Fovista and Roche/ Genentech's Lucentis was able to provide patients with a ~62% additional benefit over Lucentis monotherapy on the Early Treatment Diabetic Retinopathy Study (ETDRS), a widely-used standardized chart of vision testing. A Phase III Fovista pivotal trial is underway that we believe to be de-risked based on its strong similarities to Phase II, greater statistical powering, and longer duration, the latter of which could beneficial to OPHT since the delta between the Fovista add-on arm and the Lucentis monotherapy arm seemed to be widening at the end of the Phase IIb trial. While anti-VEGF (vascular endothelial growth factor) treatments such as Lucentis and REGN's (OP) Eylea have achieved rapid commercial success and strong uptake in wet AMD, we see an opportunity for Fovista to upgrade the wet AMD standard-of-care, especially in patients who begin to plateau or even decline after receiving currently available treatments for multiple years. Our view is corroborated by the results of the Lucentis long-term visual outcomes HORIZON extension study which showed that after 5 years of therapy, the aggregate visual capacity of Lucentis-treated patients returned to baseline pre-treatment levels. There are approximately 1.3 million cases of wet AMD in the US, and our belief in the commercial attractiveness of Fovista stems not only from its efficacy but literature estimates that the prevalence of wet AMD is growing rapidly with an estimated ~200,000 additional wet AMD diagnoses per year. We expect Fovista to ultimately be indicated as an add-on therapy to any anti-VEGF treatment, as Fovista is being studied in combination with each of Lucentis, Eylea, and Roche's Avastin in the ongoing Phase III program. OPHT holds strong method of treatment patent protection over Fovista in the US, EU, and Japan that expires in 2027 with extensions.

VALUATION

We estimate a \$61 per share value for OPHT based on a discounted cash flow analysis that assumes a 12% discount rate and a 2% terminal growth rate. We project Fovista revenue growth from 2018 through 2027 in the US and EU and cut it significantly thereafter at the expiration of OPHT's method-of-treatment patent. We see upside to our valuation from either: (1) less robust competition than we anticipate, or (2) the potential for Fovista to be best-in-class even in the face of anti-PDGF competition from co-formulated or augmented anti-VEGF agents.

RISKS TO VALUATION

Risks to our OPHT valuation include the possibility of disappointing clinical data, commercial shortfalls, or higher-than-anticipated regulatory hurdles. Since OPHT solely has one product in late-stage development, any of these could impact the stock significantly.

Disclosures Appendix Analyst Certification

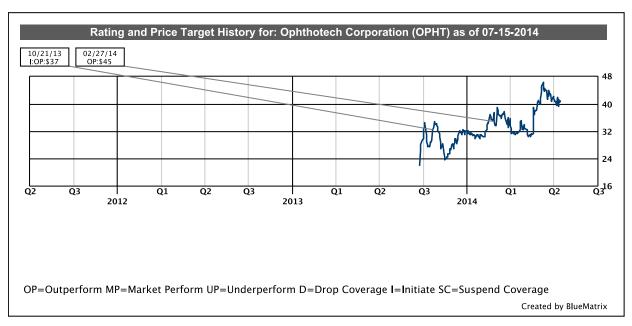

I, Joseph P. Schwartz, certify that the views expressed in this report accurately reflect my views and that no part of my compensation was, is, or will be directly related to the specific recommendation or views contained in this report.

Valuation

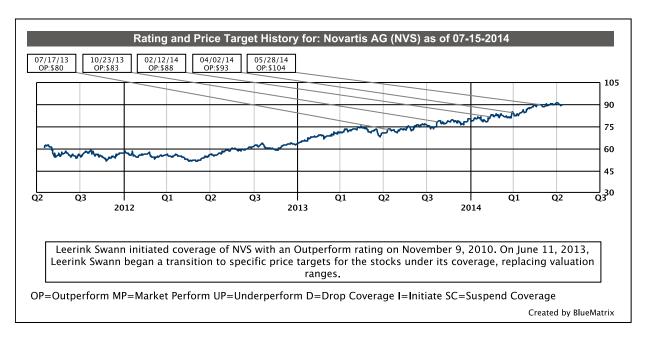

We estimate a \$61 per share value for OPHT based on a discounted cash flow analysis that assumes a 12% discount rate and a 2% terminal growth rate. We project Fovista revenue growth from 2018 through 2027 in the US and EU and cut it significantly thereafter at the expiration of OPHT's method-of-treatment patent. We see upside to our valuation from either: (1) less robust competition than we anticipate, or (2) the potential for Fovista to be best-in-class even in the face of anti-PDGF competition from co-formulated or augmented anti-VEGF agents.

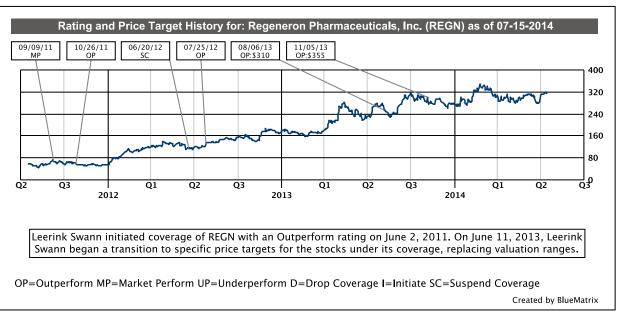

Risks to Valuation

Risks to our OPHT valuation include the possibility of disappointing clinical data, commercial shortfalls, or higher-thananticipated regulatory hurdles. Since OPHT solely has one product in late-stage development, any of these could impact the stock significantly.

D	istribution of Ratings/Investment Bankin	of Ratings/Investment Banking Services (IB) as of 06/30/14 IB Serv./Past 1: Mos			
Rating	Count	Percent	Count	Percent	
BUY [OP]	138	69.00	50	36.20	
HOLD [MP]	62	31.00	2	3.20	
SELL [UP]	0	0.00	0	0.00	

Explanation of Ratings

Outperform (Buy): We expect this stock to outperform its benchmark over the next 12 months.

<u>Market Perform (Hold/Neutral):</u> We expect this stock to perform in line with its benchmark over the next 12 months.

<u>Underperform (Sell):</u> We expect this stock to underperform its benchmark over the next 12 months. The degree of outperformance or underperformance required to warrant an Outperform or an Underperform rating should be commensurate with the risk profile of the company.

For the purposes of these definitions the relevant benchmark will be the S&P 600® Health Care Index for issuers with a market capitalization of less than \$2 billion and the S&P 500® Health Care Index for issuers with a market capitalization over \$2 billion.

Important Disclosures

This information (including, but not limited to, prices, quotes and statistics) has been obtained from sources that we believe reliable, but we do not represent that it is accurate or complete and it should not be relied upon as such. All information is subject to change without notice. This is provided for information purposes only and should not be regarded as an offer to sell or as a solicitation of an offer to buy any product to which this information relates. The Firm, its officers, directors, employees, proprietary accounts and affiliates may have a position, long or short, in the securities referred to in this report, and/or other related securities, and from time to time may increase or decrease the position or express a view that is contrary to that contained in this report. The Firm's salespeople, traders and other professionals may provide oral or written market commentary or trading strategies that are contrary to opinions expressed in this report. The Firm's proprietary accounts may make investment decisions that are inconsistent with the opinions expressed in this report. The past performance of securities does not guarantee or predict future performance. Transaction strategies described herein may not be suitable for all investors. Additional information is available upon request by contacting the Editorial Department at One Federal Street, 37th Floor, Boston, MA 02110.

Like all Firm employees, analysts receive compensation that is impacted by, among other factors, overall firm profitability, which includes revenues from, among other business units, Institutional Equities, and Investment Banking. Analysts, however, are not compensated for a specific investment banking services transaction.

MEDACorp is a network of healthcare professionals, attorneys, physicians, key opinion leaders and other specialists accessed by Leerink and it provides information used by its analysts in preparing research.

In the past 12 months, the Firm has received compensation for providing investment banking services to Ophthotech Corporation .

Leerink Partners LLC makes a market in Ophthotech Corporation and Regeneron Pharmaceuticals, Inc.

Leerink Partners LLC is willing to sell to, or buy from, clients the common stock of Novartis AG on a principal basis.

Leerink Partners LLC has acted as a co-manager for a public offering of Ophthotech Corporation in the past 12 months.
